
MESA Program Fund

The MESA Program Fund supports students from underserved backgrounds in their efforts to learn the math and science skills that are basic to technology-based careers. This program has been immensely successful and is currently run by Balkar Johl, whose enthusiasm and energy have continued to propel our graduates into some of the best universities in the country.

A gift to the MESA Program Fund will help with equipment and supply purchases for the MESA Center while, the MESA Scholarship Fund to provide direct student support. Either way, 100% of your gift will go directly to programs and services that have been demonstrated to work effectively.
