
Nursing Program Fund

The Nursing Program Fund is critical to keeping the nursing program's laboratories and services current in the rapidly evolving medical arena. The Nursing Program Fund provides equipment and supplies for this lab-intensive curriculum. Occasionally, the Nursing Program Fund also provides direct student assistance to those who have shown a combination of academic excellence and need.

With today's ongoing nursing shortage, any support you give can contribute to the well-being of the nursing profession and, thereby, the community as well.
