
Radiological Technology Fund

The Radiological Technology Fund supports a program that is a critical piece of today's medical infrastructure. Students from the Yuba Community College District's Radiological Technology Program can be found at virtually every medical facility in the region. Owing to the excellent training they receive from Dr. Angela Willson, Scott Wilson and Rich Lehrer, this program has earned an excellent reputation throughout the entire valley area – and beyond.

The Rad Tech Fund helps to provide equipment, supplies, books and programming enhancements for students in the Radiological Technology program. In company with the Rad Tech Scholarship Fund, students benefit tremendously in diverse ways from your support.
