
Veterinary Tech Program Fund

Under the Direction of Dr. Scott Haskell and Ms. Bonnie Loghry, the Veterinary Technology Program has become a recognized leader in providing technicians to regional veterinary offices. Through this service, both the agricultural community and thousands of local families have been impacted by the competency of our graduates.

A contribution to the Veterinary Tech Program will assist Dr. Haskell and Ms. Loghry in providing up-to-date laboratories, supplies and equipment for their students. Gifts of operational equipment, if needed and accepted by the College, are of immense help in this training and can be tax deductible (with appropriate documentation).
