

## Orientation

"Orientation" is a 1/2-day discussion and exploration into the teaching formats, physical demands, mental exercise, and manual dexterity requirements that every Yuba College Veterinary Technology student can expect to encounter on a daily basis in the first year of our two year AVMA fully accredited program.

Attendance and participation at "Orientation" are a **mandatory** requirement for each candidate before her/his final transition to the world of veterinary technology.

Our "Orientation" will be held on a Saturday in early June in room 810 from 9:00 AM (sharp) to 12:00 and will provide students with the foundation of knowledge to assure success in our program and subsequent career.

9:00 Welcome BL Loghry, RVT and SRR Haskell, DVM. So you want to be a Registered Veterinary Technician; what the heck does that mean? The ins and outs of veterinary technology and the profession.

9:30 How does this all work? Procedural formats within our program structure.

10:00 What do I do next? Review of weekly format for VETT1. Review of the required kennel care program. What about VETT 55?

10:30 Come on, is this really a clinic? Review of our facilities, the big picture and how do I fit in.

11:00 Break

11:15 OK but does it really matter? What constitutes appropriate professional behavior with clients/patients/faculty/staff/peers and how do I fit into animal care at YCC?

11:15 Questions and answers. How about closure?

12:00 Adjournment - See you all in the fall!
